

Vishnu T S

MERN Stack Developer

vishnusanthosh11124@gmail.com | +91 9744348702 | Alakode, Kannur, Kerala | Portfolio | LinkedIn | GitHub

PROFILE

MERN Stack Developer with hands-on experience building full-stack web applications through internships and projects using MongoDB, Express.js, React.js, and Node.js. Skilled in developing REST APIs, responsive React interfaces, JWT authentication, Redux Toolkit, and RTK Query. Built real-world applications including hospital appointment and e-commerce platforms, with integrations for Razorpay, Stripe, and Cloudinary. Seeking to contribute strong problem-solving skills and practical full-stack development experience to a software development team.

WORK EXPERIENCE

Web Development Intern

08/2025 – 10/2025

Alpha Innovation

- Engineered responsive web applications using React.js, JavaScript, and Tailwind CSS, ensuring cross-browser compatibility across desktop, tablet, and mobile devices.
- Architected a reusable UI component library, reducing redundant code and improving development efficiency across the project.
- Integrated REST APIs to fetch and render dynamic data, and collaborated via Git/GitHub using feature branching, pull requests, and code reviews.

Web Development Intern

03/2025 – 07/2025 | Bangalore

Zidio Development

- Built a full-stack e-commerce application using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering both frontend and backend functionalities end-to-end.
- Developed modular, reusable React components and responsive UIs with Tailwind CSS, improving code maintainability and scalability.
- Worked within an Agile team across sprint planning, daily standups, and code reviews, while contributing to debugging, testing, and performance optimization.

EDUCATION

MCA (Master of Computer Application)

08/2023 – 07/2025 | Kannur, Kerala

Chinmaya Institute of Technology

BSc Computer Science

07/2020 – 03/2023 | Kannur, Kerala

Taliparamba Arts and Science College

SKILLS & TOOLS

Frontend — React.js, JavaScript (ES6+), Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, RTK Query

Backend — Node.js, Express.js, Python, REST APIs, JWT Authentication

Database — MongoDB, Mongoose, MySQL

Tools & Services — Git, GitHub, Postman, Cloudinary, Stripe, Razorpay

Other — Responsive Web Design, Role-Based Access Control, API Integration

PROJECTS

MediBook – Hospital Appointment Management Platform | MERN Stack

- Developed a full-stack hospital appointment platform with separate Patient, Doctor, and Admin portals, covering the complete appointment management workflow.
- Designed and implemented a dynamic scheduling system that generated doctor-specific slots based on working days, availability, slot duration, booked slots, and leave dates.
- Integrated JWT authentication, role-based authorization, Cloudinary, and Razorpay to provide secure access, image management, and online appointment payments.
- Built REST APIs and management workflows for doctors, appointments, patient profiles, availability, leave requests, and payment tracking, gaining practical experience in full-stack architecture and real-world API integration.

ThreadVibe – E-commerce Platform | MERN Stack

- Developed a full-stack e-commerce platform with separate Customer and Admin modules for products, carts, orders, reviews, and product management.
- Implemented JWT authentication and role-based access control for secure customer and admin functionality.
- Used Redux Toolkit and RTK Query for state management and efficient API data handling.
- Integrated Stripe and Cloudinary for online payments and product image management.
